

## THE PROBLEM WITH DNA TESTING FOR ANCESTRY

- 1 generation back = 1 ancestor ignored
  - 2 generations back = 4 ancestors ignored
  - 3 generations back = 11 ancestors ignored
  - 4 generations back = 26 ancestors ignored
  - 5 generations back = 57 ancestors ignored
  - 6 generations back = 120 ancestors ignored
- The farther back you go, the more ancestors are eliminated from consideration.

**All 126 ancestors contributed DNA**
