

THE PROBLEM WITH DNA TESTING FOR ANCESTRY

- 1 generation back = 1 ancestor ignored
 - 2 generations back = 4 ancestors ignored
 - 3 generations back = 11 ancestors ignored
 - 4 generations back = 26 ancestors ignored
 - 5 generations back = 57 ancestors ignored
 - 6 generations back = 120 ancestors ignored
- The farther back you go, the more ancestors are eliminated from consideration.

All 126 ancestors contributed DNA
